***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/26/04 has been entered.

***Allowable Subject Matter***

2. Claims 9, 12, 14, 23-28 and 51-71 are allowed.

3. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to suggest the claimed methods of conductively interconnecting electronic components, particularly having a conductive adhesive comprising an epoxy terminated silane attached to a battery or nickel surface. As noted in the response and declaration filed on 8/26/04 a comparison of the electrical conductivity of the claimed conductive epoxy adhesive with silane additives bonded to a nickel surface or a battery with the conductive epoxy adhesive of the prior art (without silane) bonded to a nickel surface or a battery demonstrates the unexpectedly higher conductivity with the epoxy terminated silane. This showing of unexpected results is considered sufficient in accordance with MPEP Section 716.01 to overcome the 103(a) rejections of the claims.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
